

Project Management Accelerator for Corporations

An intensive 5-week **course** that combines LIVE PM skill building sessions and coaching. Challenge your engineering professionals with project-based learning and a real-life project management challenge that must be solved through the course.

Benefits to Employers:

- Improved efficiency in defining project scope, scheduling, and budgeting using the 13 Questions strategy
- Better cost estimating through three proven estimating techniques
- Enhanced competence and capability in delivering successful projects with knowledge of scheduling basics, contract terms, and scope creep
- Improved project communication skills including running effective meetings

"Ann is an excellent engineer and presenter who has always provided outstanding instruction and services to ASCE's on-site training clients. She strikes a wonderful balance of professional expertise, experience, and approachability in meeting the specific objectives of each training program."

- John Wyrick, Manager, On-site Training Worldwide, ASCE

"Ann is a very talented Project Management Consultant who I had the pleasure of hiring many times over the last decade. Ann is patient, creative and a true expert in the field. Ann took on a very challenging project and helped create a Project Management Methodology incorporating the PMI standards."

- Kathy M., Director, Operational Performance Training Henkels & McCoy, Inc.

All engineering **professionals**. Firms might enroll a mix of engineers, scientists and even admin and accounting staff.

Next session starts March 16, 2020. Includes 5 live skill building sessions (recordings provided). **Total time commitment is 5 to 10 hours.**

Cement new skills through a project management challenge and **presentation** to our coaches

5PDHs available in most US States. Enrollees will receive a completion **certificate and digital badge.**

Lead Trainer:

Ann M. Tomalavage, P.E., PMP, LEED AP
A globally recognized project management trainer and speaker with over 30 years of project management experience.
